

# Yealink T32G User Guide

## Introducing Your Yealink T32G IP Phone

The SIP-T32G IP Phone is ideal for users with demanding collaborative communication needs. It is a future-proofing network investment which supports seamless migration to GigE-based network infrastructure. Dual-port Gigabit Ethernet is designed for flexible deployment options and lower cabling costs, while its high-resolution TFT colour display provides an eye-catching depiction of callers' information. The user interface is designed for clarity and intuitive operation

## An Overview of Your Yealink T32G IP Phone

## Tips for Using Your Yealink T32G IP Phone

---

### Making a Call

Users can make a call by pressing the Hands – free/ Line key or picking up the handset

- Dial number directly: Dial the number directly, and press Send soft key/button
- Dial from Pool: In dial – up interface, press Pool hot key, enter the highlighted options, select a record, then press Send to dial out.
- Re-dial: Press RD button to enter the Dialed Calls interface then select a record to dial out.

### Answering a Call

Answering an incoming call in the following ways:

- If there are no active calls, lift the handsets or press the Hands-free button/ Answer hot key/ Headset to answer the incoming call
- If there are active calls, press the answer hot key to answer the incoming call or press the Reject hot key to refuse

### Muting a Call

- Press Mute button to mute the call during the conversation, the LCD will display 
- Press Mute button again to turn on the microphone

## Operating Instructions

<b>Notice</b>	<ol style="list-style-type: none"> <li>1. If the WAN (wide area network) connection fails to a site for any reason, including a fault on the circuit or a power cut, then the ability to make and receive calls from the IP phones utilising that WAN circuit will be restricted. These failures may be caused for reasons outside our control. Other services will be fully maintained including voice mail and the ability to divert calls to other numbers including mobiles. If another working WAN circuit is available at that site then this can be used to fully restore service to all phones.</li> <li>2. This service allows for calls to 999 and 112, however these services will be affected if there is a power cut or your WAN circuit fails</li> <li>3. With regard 999 services no location information is passed to the emergency services operator this will mean that you will have to state the address that you wish the emergency service to attend.</li> <li>4. We do not offer a paper based telephone directory service</li> <li>5. If you require a PDF that allows you to print off stickers to attach to the phone device explaining the above please contact us.</li> </ol>
